# Priya Sharma

Dehradun, Uttarakhand, India | +91 9041093889 | priyanautiyal978@gmail.com
LinkedIn | GitHub | Portfolio | LeetCode

## Summary

**2**026 **Computer Science** graduate building **AI-powered applications** and **full-stack web systems**. Develops **RAG pipelines** with **LLM APIs** (Gemini, Claude), **vector embeddings**, and **semantic search**, alongside **MERN Stack** apps with **RESTful APIs**, **JWT authentication**, and **PostgreSQL**. Freelance experience delivering features on a live **Next.js** and **Supabase** website.

## Education

**Graphic Era Hill University, Dehradun** **2022 – 2026**
*Bachelor of Technology in Computer Science & Engineering* *CGPA: 7.1/10*

**Ashoka Girls Senior Secondary School, Sirhind** **2021 – 2022**
*Senior Secondary (Class XII) – Physics, Chemistry, Mathematics* *91.2%*

## Experience

**Naamin** **Jan 2026 – Apr 2026**
*Full-Stack Web Developer (Freelance) – Next.js, React.js, Supabase – naamin.com* *Remote*

- Shipped full-stack features for naamin.com, a live baby-name discovery website, over a 4-month collaboration with the founder, turning product requirements into production pages.
- Powered name search with 3 filters (gender, starting letter, popularity) and 2 user features (wishlists, saved shortlists) by querying the Supabase database through its JavaScript client.
- Updated pages across a product with 10+ name tools, user accounts, and 22-language support, including Name Finder, Nickname Finder, and a Name Report with PDF download.
- Resolved UI and functional issues across 2 platforms (desktop and mobile browsers), iterating on the founder's feedback.

## Projects

**Doc Intelligence – RAG-Based PDF QA System** | *Node.js, Express.js, PostgreSQL, pgvector, BullMQ* **GitHub**

- Built a retrieval-augmented generation (RAG) service that answers natural-language questions over uploaded PDFs, splitting documents into 400-token chunks with 60-token overlap so every answer cites its source page.
- Implemented semantic search over 1024-dimensional embeddings in PostgreSQL with pgvector, retrieving the top 8 chunks via an IVFFlat index, and moved parsing and embedding to BullMQ background workers.
- Designed a provider-agnostic LLM layer that switches between 2 providers (Gemini, Claude) without code changes, exposed through RESTful APIs on Express.js.

**ICON Store – Full-Stack MERN E-Commerce Platform** | *MongoDB, Express.js, React.js, Node.js, Mongoose, JWT* **GitHub**

- Developed a MERN Stack e-commerce platform serving 3 user roles (customer, seller, admin) with role-based access control, JWT authentication, and bcrypt password hashing.
- Architected 14 RESTful API endpoints across 4 route modules and 4 Mongoose models for product search, filtering, wishlist, and cart, with MongoDB indexes for efficient catalog queries.
- Engineered an admin dashboard with CRUD operations over users, sellers, and orders, and automated builds and deployment through a CI/CD pipeline.

## Open Source

**KubeStellar – CNCF Sandbox Project (Multi-Cluster Kubernetes Configuration Management)** **Pull Request**

- Submitted a documentation fix to KubeStellar, a CNCF Sandbox project for multi-cluster Kubernetes configuration management; the pull request was reviewed by maintainers and merged (Mar 2025).

## Skills

**Programming Languages**: JavaScript, Python, C++, SQL
**Frontend**: React.js, Next.js, HTML5, CSS3, Tailwind CSS
**Backend**: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control, BullMQ
**Databases**: MongoDB, Mongoose, PostgreSQL (pgvector), Supabase
**AI & ML**: Generative AI, Retrieval-Augmented Generation (RAG), LLM Integration (Gemini, Claude APIs), Prompt Engineering, Vector Embeddings, Vector Databases (pgvector), Semantic Search, Document Chunking
**Cloud & DevOps**: Git, GitHub, Docker, CI/CD (GitHub Actions), AWS (EC2, S3, IAM), Google Cloud
**Core CS Concepts**: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

## Achievements

- **Hack2Hustle – National Hackathon, Masters' Union (May 2025):** Ranked in the Top 30 of 3000+ participants by delivering a working software solution under competitive time constraints.
- **HackWith India – National Hackathon (Apr 2025):** Placed in the Top 50 of 2000+ participants in a national-level virtual hackathon.
- Solved 250+ Data Structures & Algorithms problems on LeetCode and other competitive programming platforms.
- **AWS Solutions Architecture Job Simulation (Forage, Nov 2025):** Designed a scalable hosting architecture using AWS EC2, S3, IAM, and load balancing.
- **Google Cloud Arcade Program:** Earned 34 Google Cloud badges, including Manage Kubernetes in Google Cloud, through hands-on labs on Compute Engine, Cloud Storage, and IAM.
- Mentored peers in building and deploying MERN Stack applications with React.js, Node.js, Express.js, and RESTful APIs.
