Summary

Software Developer with hands-on experience building **full-stack web applications** using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js). Proficient in **C++**, **Java**, **Python**, **JavaScript**, **RESTful API** development, **JWT authentication**, and **CI/CD pipelines**, with working exposure to **cloud platforms** (AWS, GCP) and **Kubernetes**. Strong foundation in **Data Structures & Algorithms**, **object-oriented programming**, and **system design**. Actively contributes to open-source projects and enjoys building well-tested, maintainable software.

Education

Graphic Era Hill University, Dehradun — **2022 – 2026**
Bachelor of Technology in Computer Science & Engineering — *CGPA: 7.5/10*

Ashoka Girls Senior Secondary School, Sirhind — **2021 – 2022**
Senior Secondary (Class XII) – Physics, Chemistry, Mathematics — *91.2%*

Projects

ICON Store – Full-Stack MERN E-Commerce Platform | *MongoDB, Express.js, React.js, Node.js, JWT* — **GitHub**

- Developed a scalable **full-stack e-commerce platform** using **MERN Stack** with **3-role access control** via **JWT authentication** and **bcrypt** encryption, supporting concurrent users securely.
- Architected **RESTful APIs** for search, filtering, wishlist, and cart features, reducing product discovery time by **35%** through streamlined **MongoDB** queries and indexing.
- Implemented an Admin dashboard with **CRUD operations** to manage users, sellers, and orders; automated deployment via **CI/CD pipeline**, improving workflow efficiency by **50%**.

CinderPeak – C++ Graph Algorithm Library | *C++, Google Test, GitHub Actions, CI/CD* — **GitHub**

- Designed a modular **C++ graph library** supporting **10+ algorithms** (BFS, DFS, Dijkstra, MST) with a clean API interface for scalable integration in large-scale systems.
- Enhanced performance using **multi-threading** and **memory management** techniques, reducing benchmark computation time on large graph datasets.
- Established **90%+ test coverage** using **Google Test**; configured **CI/CD pipeline** with **GitHub Actions** for automated builds and deployed comprehensive technical documentation.

CSE Assist – Student Support Chatbot | *JavaScript, Python, Node.js, JSON* — **GitHub**

- Built a **full-stack chatbot** application resolving **500+ CSE-related queries** with an intuitive UI; integrated **NLP-based** pattern matching for accurate, real-time query resolution.
- Engineered backend logic in **JavaScript and Python**, increasing response accuracy by **30%** through iterative algorithm refinement and **unit testing**.
- Structured **JSON-based datasets** for scalable query-response mapping; optimized data retrieval logic to cut average response time by **25%**.

Open Source Contribution

KuberStellar – Kubernetes Multi-Cluster Configuration Project — **Pull Request**

- Submitted a documentation fix via pull request that was reviewed and merged into the **KuberStellar** open-source repository (Mar 2025).

Technical Skills

Languages: C, C++, Java, Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Microservices
Databases: MongoDB, Firebase, MySQL
DevOps & Cloud: Git, GitHub, Linux, Docker, Kubernetes, AWS, GCP, CI/CD, GitHub Actions
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, System Design, Agile Methodologies

Honors & Achievements

- **AWS Solutions Architecture Job Simulation (Forage, Sep 2025):** Completed cloud architecture design simulation using **AWS** services including **EC2, S3, IAM**, and load balancing.
- **Hack2Hustle – National Hackathon, Masters' Union (May 2025):** Ranked in **Top 30 out of 3000+** participants; delivered a working software solution under competitive time constraints.
- **HackWith India – National Hackathon (Apr 2025):** Placed in **Top 50 out of 2000+** participants in a national-level virtual hackathon.
- **Google Cloud Arcade Program:** Practiced **GCP** infrastructure fundamentals through labs on **Compute Engine, Cloud Storage, and IAM**.
- Mentored **5+ peers** in building and deploying **MERN Stack** applications covering React.js, RESTful APIs, Node.js, and Express.js, improving peer productivity by **30%**.
- Solved **250+ Data Structures & Algorithms** problems on **LeetCode** and other competitive programming platforms.
